Biocen 22 R

THE COMPANY

Ortoalresa was born in Madrid, Spain, in 1949 as local manufacturer of laboratory equipment. Almost 70 years later, after a lot of hard work, confidence and passion for what we do, we have become a dynamic and innovative company with global presence, which has led us to become one of the European manufacturers benchmark.

Our DNA leads us to search for solutions based on innovation and sustainability, and we are chosen as the best option for laboratories due to the quality of our products and services.

We collaborate with our clients to let them carry out their processes in a simple, safe and efficient manner. Placing functional equipment at their disposal to facilitate everyday work and providing them with a rapid answer and monitoring of their complaints, questions and queries.

Our company philosophy conditions how we understand our productive processes, from design to recycling, specialised assistance and environmental commitment, compliant with ISO 9001 and 13485 standards.

We are the present and the future in centrifugation for laboratories, where the integration of quality, reliability and simplicity are top priorities.

ENVIRONMENTAL RESPONSIBILITY

Our commitment to the environment implies a responsibility that can be seen at all levels: from production processes to management.

We use materials that are coherent with this concept, enabling our teams to include more than 95% recyclable components, thus prolonging the life of raw materials and avoiding the exhaustion of natural resources.

We avoid the use of dangerous substances in the manufacturing processes, complying with the RoHS Directive, on the restriction of hazardous substances.

In our sustainable manufacturing line, in refrigeration systems we only use fluorinated gases of low impact on the ozone layer in the centrifuges, i.e., those that produce the least greenhouse effect compared with commonly used products. In this sense, we have anticipated the coming into force of regulations on new gases, incorporating them into our equipment before they become mandatory. Thus, we ensure that equipment manufactured before these regulations come into force can be easily maintained.

Comparative chart of equipment

LED Equipment provided with LED screen.

LCD Equipment provided with LCD screen.

Refrigerated centrifuge.

PCBS (1): Progressive Controlled Braking System.

Centrifuge available with IVD marking.

Package - Close configuration: centrifuge + remarked rotor.

Which centrifuge it is suitable for my tubes?

PCR strips 0,2 ml.

IVD LCD

MINICEN

Max. capacity: 12 x 1,5-2 ml.

Max. speed: 15.596 xg/15.000 RPM

- Small footprint: 4 kg. of weight.

LCD screen:

- Shows RPM/ RCF, time, rotor spinning and lid status.
- Speed programming in 100 RPM/100 xg steps.
- Timer from 30 sec. to 999 min. programmable in 1 sec. steps and hold position.
- Timer with countdown at time set.
- Several acoustic and visual messages warning the user the device situation.

Easy to use

- Microprocessor controlled.
- PC connection by USB.
- Induction motor maintenance free (brushless).
- Noise level: below 60 dB.
- Start, stop, open lid and short spin with adjustable speed buttons.
- Option RPM/ RCF adjustment along the run
- Automatic open lid.
- Last values remain in memory.

Safety

- Lid provided with security systems:
 - Automatic lid lock system, motorized.
 - Emergency lid-lock release.
 - Locking and protection against opening along run.
 - Lid dropping protection.
 - Port in the lid for calibration and operation checking.
- Unbalance detection and switch off.
- Rotors can be removed with the lid closed.
- Rotors and adapters autoclavable, easy to install by the user.
- Forced ventilation to reduce temperature increasing.

MICROCEN 24

orto
alresa

Max. capacity: 10 x 15 ml.

Max. speed: 6.511 xg / 8.000 RPM

LED screen:

- Shows RPM/ RCF and time.
- Speed programming in 50 RPM/ 10 xg steps.
- Timer countdown/up from "0" or at "set RPM/ RCF" for reproducible tests.
- Timer from 1 to 99 min. programmable in 1 min. steps and hold position.
- Acceleration and deceleration control in 3 steps: fast, soft and free.
- Acoustic and visual messages on screen warning the user the equipment status.

Easy to use

- Microprocessor controlled.
- Induction motor maintenance free (brushless).
- Rotors list on memory.
- Noise level: below 60 dB.
- Start, stop, open lid and short spin with adjustable speed buttons.
- Free/locked adjustment of RPM/ RCF along the run.
- Automatic open lid, programmable.
- Last values remain in memory.
- Over-speed protection.

Safety

- Lid provided with security systems:
 - Automatic lid lock system, motorized. Emergency lid-lock release.
 - Locking and protection against opening along run.
 - Lid dropping protection.
 - Port in the lid for calibration and operation checking.
- Unbalance detection and switch off.
- Protection safety ring between the centrifugation chamber and the housing.
- Chamber of centrifugation in stainless steel (easy cleaning).
- Rotors and adapters autoclavable, easy to install by the user.
- Forced ventilation to reduce temperature increasing
- Automatic disconnection for energy saving, with deactivation option.

BIOCEN 22 R

orto
alresa

Max. capacity: 8 x 15 ml.

Max. speed: 31.865 xg / 18.100 RPM

LCD screen:

- Shows RPM/RCF, time, temperature and acceleration/deceleration (PCBS).
- Speed programming in 50 RPM/ 50 xg steps.
- Timer countdown/up from "0" or at "set RPM/ RCF" for reproducible tests.
- Timer from 1 to 99 min. programmable in 5 sec. steps and hold position.
- PCBS: Progressive controlled acceleration and braking system up to 175 selectable ramps that prevents sample homogenization after separation.
- 16 programmable memories.
- Several acoustic and visual messages warning the user the device situation.

Easy to use

- Microprocessor controlled.
- Induction motor maintenance free (brushless).
- Rotors list on memory.
- Noise level: below 60 dB.
- Start, stop, open lid and short spin with adjustable speed buttons.
- Free/locked adjustment of RPM/ RCF along the run.
- Last values remain in memory.
- Automatic rotor recognition. Over-speed protection.

- Unbalance detection and switch off.
- Protection safety ring between the centrifugation chamber and the housing.
- Chamber of centrifugation in stainless steel (easy cleaning).
- Rotors can be removed with the lid closed.
- Rotors and adapters autoclavable, easy to install by the user.
- Automatic disconnection for energy saving up to 8 h.

Refrigeration

- Remains the refrigeration after centrifugation process.
- Precooling program with rotor spinning and temperature selectable.
- Guarantee 4 °C at maximum RPM.
- Temperature range from -20°C (-4°F) to 40°C (104°F) in 1°C steps.
- Temperature sensor inside the chamber.
- Gas R 449A HFO (CFC free).

Safety

- Lid provided with security systems:
 - Automatic lid lock system, motorized.
 - Emergency lid-lock release.
 - Locking and protection against opening along run.
 - Lid dropping protection.
 - Port in the lid for calibration and operation checking.
