

NE-M500

Simple Solutions to Complex Problems

by New Era Pump Systems Inc.

Applications

New Left-Hand Drive Syringe Pump System

Smart – Simple – Cost Effective
Place Pump in **any Direction!**

Features:

A simple, cost-effective - and versatile, pumping system to position a syringe to dispense towards the **left, rear, up, down - wherever**, while maintaining a **forward-facing keypad and display**.

For constrained work spaces that require positioning of a syringe pump while maintaining access to the keypad and display.

The NE-M500 base package includes:

- NE-500X OEM Single channel syringe pump, with upgraded 'X version firmware
- Bottom cover assembly
- NE-1100X Programmable control box with upgraded 'X version firmware
- CBL-DUAL-KIT containing all necessary cables to connect modules to each other and to a computer
- Power supply
- PWRSUP-EXT-2 Power supply 2 plug extension cable
- User manuals

The control box can be programmed and setup as any of our programmable syringe pumps, including the uploading of programs and remote control. Includes the upgraded 'X firmware.

The base package can be **upgraded** to include **any OEM syringe pump model** and/or add additional pumps in a pump network configuration. For example, the NE-500 one channel syringe pump can be substituted with the NE-4500 two channel syringe pump. Or, both the NE-500 and NE-4500 can be networked together and operated as a 3-syringe system, operated by the control box.
